

Tom Lindblom AIA, LEED AP

Senior Associate, Gensler - London

Tom's international experience on a wide range of architecture projects has led him to create outstanding solutions that are driven by his client's cultural aspirations and financial objectives.

The challenges and opportunities for sustainable design and energy efficiency factor into all his projects - evaluating site conditions, proper use of natural lighting, efficient use of LEED standards, and understanding client requirements are prominent themes in all his designs.

Whether the clients are in the UK, Bulgaria, Abu Dhabi or Colorado, Tom's experience and global awareness ensure that his design and delivery of complex projects enhance economic growth, a sustainable future and add cultural significance.
